

21 December, 2015

To whomsoever it may concern

This is to inform you that **Ishan Guliani**, a student at Amity School of Engineering & Technology, has served as a **Google Student Ambassador** for the academic year 2014-15.

The Google Student Ambassador Program is an opportunity for students to act as liaisons between Google and their universities. During the 2014-15 academic year, the GSAs worked in the following areas:

- Host and organize events to increase skills in areas of computer science and digital marketing.
- Host and organize events to bring awareness about Google products and technologies that are useful for research and education process at the university.
- Spread word about competitions, boot camps, scholarships and other Google opportunities that enrich the student educational experience and strengthen their skills to be fit for the job market.
- Are a source of knowledge in the university about Google products and technologies.

Google Student Ambassadors participate in a full-fledged, relevant training at the beginning of their tenure. This provides them with skills that include planning and organizing events in addition to leadership, presentation, communication and time management skills.

In case of questions, please do not hesitate to reach out to us.

Regards,

Deepak Sridhar,
Program Manager, Google Student Ambassador Program

Career Milestones

KEY ACHIEVEMENTS AND EXPERIENCES

EXPERIENCED PUBLIC SPEAKER

- Technical Speaker at 4th India International MSME & Startup India Expo 2017
- Presented talk on "App shrinkage with proguard: gradle build system on Android" at Google Developer DevFest 2017
[Link to the presentation](#)
- Speaker at United Overseas Bank TheFinlab FinTech Startup Conference 2016
[Link to the official event page](#)
- Speaker at Digital India Conference 'Convergence 2016'
- Presented tech talk on Android Mobile System at Google Developer DevFest 2016
- Speaker at FinTech Conference in Mumbai 2016, India

GOOGLE STUDENT AMBASSADOR 2014-15

- Selected to be one out of 177 GSAs from India

Roles: Worked as teaching assistant/student community liaison between my university and Google, India

- Facilitated campaigns, training sessions and hands on workshops for undergraduate students in the disciplines of cloud computing, Android app development and digital marketing
- Lead a team of fifteen core members with an extended team of more than 140 volunteers

Impact Created: Taught over 2000 undergraduate students from over ten universities across India over 14 months. 72% of them secured job offers in technical fields right out of college

EXPERIENCED ENTREPRENEUR NATIONAL BEST STARTUP AWARDEE

As a passionate engineer, I've been part of multiple technology startups over the last 3 years.

Aug 2016 - Dec 2017

Startup Name: Applop Mobile Solutions Private Limited

Designations held over two years: VP of Engineering, Senior Android engineer

Impact Created: Scaled number of users from 0 to 50,000 in a span of 11 months

- National award for best startup at the *4th India International MSME and Startup Expo 2017*.
 - Best startup state award by honorable State Minister of Chhattisgarh, India

[Link to Press Release \(Inc42\)](#)

Nov 2015 - July 2016

Company: Glance Mmedia Technologies Private Limited

Designations held over a year: Founding team member, Technical lead

COMPETENT LEADERSHIP SKILLS

Professional

Nov 2016 - Dec 2017 : VP of Engineering, Applop

Nov 2015 - July 2016 : Founding Team Member, Tech Lead, Glance Mmedia

Aug 2016 - Nov 2016 : Senior Mobile Engineer, Applop

Undergraduate

2014-15 : President, Google Students' Club, Amity School of Engineering and Technology

2013-14 : President, Wordsworth (Editorial Club)

2012-13 : Technical Editor, Indian Society for Technical Education (ISTE)

2012-2013 : Reporter, IEEE, Amity School of Engineering and Technology

High School

2012 : Cultural Activities Captain in School Council

2011 : Assistant Head Boy in School Council

2010 : Chief Editor of Student Editorial Board

NATIONAL HACKATHON AWARDEE

- Best App Award | National Hackathon | Issued by : IIIT-Delhi March 2015

Made an application on the theme of Education as a means of allowing parents to teach their children using Near Field Communication (NFC) mobile technology

- Most Innovative App Award | Issued by : Tapzo (formerly Akosha India) July 2014

Won 48 hour National Hackathon. Made an app to reduce the waiting time in bank atm queues

- Best App Runner's Up | National Hackathon | Issued by : IIIT-Delhi August 2014

Won 24 hour Inter National Hackathon - made an application to mark attendance of students through NFC chips and bluetooth beacons

Date: 30 / 11 / 2017

Letter of Recommendation

Ishan Guliani joined our company in August 2016, as Senior Android Engineer and within 4 months, was promoted to his present position of Vice-President, Engineering. He has been a core team member and an integral part of the company ever since. Since the beginning of his stint with our organization, Ishan has been directly reporting to me. As founder and serial entrepreneur, I can easily say that Ishan exemplifies the true spirit of an engineer whose passion and hunger for solving problems is laudable. He has added profound value to the company with his technical skills, persuasive interpersonal skills, leadership, never say no attitude and his ability to build and culture teams efficiently. He has demonstrated a strong work ethic which is not found in many people of his age.

Ishan's duties at Applop have been varied and challenging. He has been responsible for developing the company's mobile platform from early stages and keeping the technology department aligned with the changing demands of the market. With his excellent programming abilities and team leadership he could always be relied upon to handle complete build lifecycles from prototype to production stage. Ishan is a gifted orator. He can interpret and explain information meticulously. He has represented the company nationally and internationally at various events, including public events and VC pitching events. Ishan is a dedicated professional who has always gone beyond call of duty. He did not restrain from handling work from other departments of the company whenever needed. Besides delivering output within deadlines that were given to him by me or other senior members, he likes to set deadlines of his own and abides by them with utmost sincerity.

Ishan's exceptional strength lies in his passion for solving problems and his ability to deliver results under extreme pressure. He is able think out of the box in finding solutions and implementing them quickly. In December 2016 he helped the company revive its crucial Google developer account that we had lost due to unforeseen circumstances. He believes in failing fast to get the best result faster. He is resourceful, pragmatic, cooperative and always willing to share his knowledge. He could always be seen thinking loud on glass walls of the office and also promote weekly tech talks for ensuring all members were up to date with new technologies.

Applop Mobile Solutions Pvt. Ltd.

#33, Ground Floor, JMD Megapolis, Sohna Road, Sector – 48, Gurgaon (Haryana) India

www.applop.com

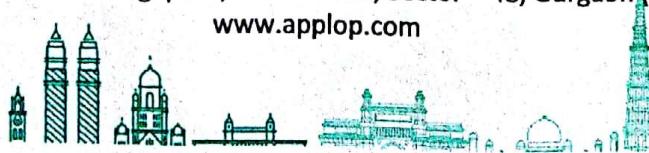

For the past 4 months Ishan has been independently handling a reputed international client of the company as a project manager. He is great at maintaining detailed technical documentations and instructing his colleagues about problem statements and their respective course of action. He is able to easily mingle with people from different backgrounds. He has attained high level of leadership skills and is very passionate about what he does.

Ishan has established standards by becoming an example for the other employees and interns during his engagement with Applop. I am glad that he has decided to specialise in the field that he loves. I state my strong recommendation for Ishan and find him the perfect candidate for admission to a rigorous graduate program in Computer Science. I wish him all the best for his future endeavors.

Rahul Singh

To whomsoever it may concern

Among the two thousand students I have taught in the last eighteen years, Ishan qualifies to be part of those few focussed, determined and dedicated students, who have meticulously worked to sharpen their programming skills and algorithm complexity factors to develop genuine interest in software design.

But with his communication excellence and history of winning debate competitions, he also enjoys working with heterogeneous teams and mentor juniors through various clubs. Having taught him programming techniques and discussed with him about relevant research practices, before his debate competitions, I was forced to select him as the President of the college literary club. This was followed by his intense involvement in the development of in-house project incorporating various tools of open source computing.

In the third year, he explored data mining algorithms and web analytics and was keen to initiate his startup. On my advice, he joined a young startup and used to frequently update me about his technical achievements. I was pleased to see him participating in the "*Fourth India International MSME and Startup Expo 2017*" where his team won the award for the best technology startup working for MSME development.

Now with sixteen months of extensive programming, debugging, project design, configuration management, implementation and branding experience, I am sure that Ishan will prove his worth as a deserving candidate in the advanced course of any reputed university and become an effective, reliable, global solution provider.
